RESEARCH SUMMARY

Professor of Computer Science at USN whose research focuses on modelling, optimization, and performance evaluation of communication networks. Core areas include the Recursive InterNetwork Architecture (RINA), post-IP networking, and scalable congestion-control mechanisms for resilient networked systems.

Current work connects next-generation wireless and IoT connectivity—including 5G/6G, Wi-Fi 6/7, BLE 5, and ad hoc networks—with AI/ML-supported analysis for secure, energy-aware networking, cyber-risk intelligence, and industry-integrated digital infrastructure.

CURRENT POSITION(S)

- 2023–present **Professor** — University of South-Eastern Norway, School of Business, Drammen
- Program Coordinator, Industry Bachelor in IT and Information Systems
 - Program Advisor/Coordinator, Microsoft Learn for Educators (MSLE)
 - Program Coordinator, Cisco Networking Academy (NetAcad)
 - Program Coordinator, Oracle Academy
 - Program Coordinator, Red Hat Academy
 - Program Coordinator, Amazon Web Services (AWS) Academy

RESEARCH INTERESTS

- | | |
|---------------------------------|---|
| Digital Infrastructures | Intelligent, resilient, secure, and energy-aware networked systems for trustworthy digital infrastructure. |
| Network Architecture | Communication-network architecture, Recursive InterNetwork Architecture (RINA), post-IP networking, and programmable systems. |
| Performance Optimization | Congestion control, theoretical modelling, simulation, performance evaluation, and system optimization. |
| Autonomous Operations | AI/ML for monitoring, anomaly detection, decision support, cyber resilience, and self-adaptive network operations. |
| CPS, IoT & Edge | 5G/6G, IoT, ad hoc and edge-connected systems, cyber-physical systems, and critical digital infrastructure. |

PROFESSIONAL MEMBERSHIPS

- | | |
|--------------|--|
| 2025–present | Associate Member, Data Communication Industry Alliance (Datacom-IA) |
| 2021–present | Member, Norwegian Artificial Intelligence Research Consortium (NORA) |
| 2018–present | European Commission (EC) Expert |

TEACHING EXPERIENCE

- | | |
|-------|---|
| Scale | Around 2,800 students taught across 67 courses (45 full-length and 22 short), spanning 42 Bachelor, 7 Master's, and 2 PhD course offerings. |
|-------|---|

Course Design	7 courses developed from scratch; 3 of them (AI, Software Engineering, Databases) became best-selling textbooks and lecture notes.
Evaluation	Student-evaluation score 18.5/20 for Fundamentals of Computer Programming, University of Tehran (2010) — above the school average of 17.5.

› University of South-Eastern Norway

2023–present

- Artificial Intelligence and Machine Learning
- Business Intelligence and Data Warehouses
- Full-Stack Development with Java Spring and React
- Object-Oriented Programming (Java)
- Digital Transformation
- Various workshops: Python, Git, Docker, OpenCV, GitLab CI/CD, React Native, Azure Cloud, etc.

› Previous Teaching Experiences

2022–2023	Subject Matter Expert — Noroff, Oslo Front-End Development, Embedded Systems (IoT/robotics), Full-stack Development
2020–2023	Guest Lecturer — Kristiania University College, Oslo Cybersecurity Operations, Computer Networks
2010–2014	Lecturer — University of Tehran, Iran Computer Networks, Programming Fundamentals, Information Systems (graduate level)
2009–2011	Lecturer — University of Sistan and Balouchestan, Iran Artificial Intelligence, Network Simulation, Software Engineering
2004–2010	Lecturer — Mahestan Institute, Tehran AI, Software Engineering, Database Systems (graduate exam preparation)
1999–2001	Assistant/Lecturer — Ferdowsi University, Mashhad C++ , Assembly, Compiler Design, Java, Web Programming, (undergraduate level)

PREVIOUS POSITIONS

2022–2023	Visiting Scholar — University of Oslo, Department of Informatics Research and student co-supervision
2016–2022	Researcher — University of Oslo, Department of Informatics OCARINA Project (Optimizations to Complete Adoption of RINA) Toppforsk project funded by Research Council of Norway • Technical Co-Lead • PhD Co-supervision • Research on recursive networking architectures
2015–2016	Postdoctoral Researcher — University of Oslo, Department of Informatics PRISTINE Project (Programmability In RINA for European supremacy of virtualised Networks) EU FP7 programme • Work Package Co-Leader • Congestion control in recursive architectures

2013–2014	Researcher — University of Tehran, School of Electrical and Computer Engineering 1.2 Tbps Router Project (Design & implementation of high-capacity IP network router) • Technical Lead • Team building and coordination (17 researchers: 4 PhD, 11 MS, 2 BS)
2011–2013	Visiting Researcher — Gwangju Institute of Science and Technology, South Korea World-Class University (WCU) Project Funded by Korean Ministry of Education, Science, and Technology (MEST) Interdisciplinary research in ICT, Materials Science, Mechatronics

INDUSTRY EXPERIENCE

2007–2009	Chief Executive Officer & Board Member — Taban Tech, Tehran, Iran Founded and led the company prior to doctoral studies; delivered industrial software-engineering projects in banking systems and e-commerce solutions.
2004–2007	Project Manager/Coordinator & Developer — Khorasan Data Processing, Tehran, Iran National and international software projects in banking and e-commerce; technologies included point-of-sale (POS) systems, smart cards, and JavaCard. (Company now active in the US.)
2002–2004	Chief Developer & Researcher — Iran Telecommunication Research Center (ITRC), Tehran, Iran ITMN (Iran Telecommunication Management Network); design and implementation of a distributed network-management platform.

INDUSTRY COLLABORATIONS

2023–present	Bayer US — Crop Science — Data science for greenhouse-gas (GHG) emission reduction USN contact point on a joint data-science problem, exploring further activities including PhD co-supervision. Contact: Prof. Khosrow Sohraby.
2018–present	Thales UK — Autonomous networking and machine-learning security Collaboration on several joint project proposals in autonomous networking and ML security. Contact: Dr. Hamid Asgari.

GRADUATE STUDENT SUPERVISION

› Doctoral Supervision

2016–2022	PhD Supervisor — Kristjon Ciko, University of Oslo <i>Devising a proxy to deploy RINA/IoT</i> Successfully defended 2022. Currently postdoc at University of Oslo.
2013–2015	PhD Co-supervisor (informal) — Muhammad Amin Araghizadeh, University of Tehran <i>UAVs in wireless sensor networks</i> Successfully defended 2016.

› Master's Supervision

Spring 2026	Marion Cecilia and W.W.A. Dilhara Wickramasinghe — USN Business School <i>Cyber Risk Intelligence for the Norwegian Energy Sector: An AI-Supported Classification Framework for Critical Infrastructure Decision Support</i>
-------------	--

Spring 2026	Milad Noori — USN Business School	<i>Evaluating Grid-Aware Coordinated Neighborhood Energy Sharing in Norwegian Residential Communities Using a Hardware-in-the-Loop Digital Twin</i>
2022–2024	Martin Mihle Nygaard — University of Oslo	<i>Successfully defended December 2024</i>
2008–2010	Mohammadreza Effatparvar — University of Tehran	<i>Routing in wireless ad hoc networks</i>
2008–2010	Seyyed Alireza Hoseini — University of Tehran	<i>High-throughput architectures for wireless networks</i>

› Bachelor's Supervision

2025–present	14 bachelor students at University of South-Eastern Norway
2010–2014	3 bachelor students at University of Tehran

› Large-Scale Project Leadership

2013–2014	Project Leader — 24-month High-capacity IP Network Router Project, University of Tehran Led team of 17 researchers (4 PhD, 11 MS, 2 BS) developing 1.2 Tbps router architecture
-----------	---

RESEARCH PROJECTS AND FUNDING

2026	Principal Investigator — IPV6-GENIE: An Agentic AI Assistant for IPv6 Planning, Configuration & Operations, DIA Open Challenge Fund, 60K Euro <i>Coordinator</i>
2016 – 2022	Technical Co-Lead — OCARINA Project, University of Oslo Optimizations to Complete Adoption of RINA
2020	Principal Investigator — Study Quality Fund, University of Oslo <i>133,000 NOK/year</i> Development of new master's program
2014 – 2016	Work Package Co-Leader — PRISTINE (EU FP7) Programmability In RINA for European supremacy of virtualised Networks
2009	Principal Investigator — Scalable MAC Protocol, Iran National Science Foundation
Success Rate	5 successful proposals as PI out of 9 initiated

EDITORIAL AND PROFESSIONAL SERVICE

› Editorial Positions

2025	Guest Editor — MDPI Symmetry Special Issue: "Symmetry/Asymmetry in Computer Network Design: Innovations in Security and Communication"
2020	Guest Editor — IEEE Communications Magazine Feature topic: "Transport Layer Innovations for Future Networks"
2020	Guest Editor — MDPI Computers Special Issue: "Post-IP Networks: Advances on RINA"

› Conference Organization

2022	Publicity Chair, 17th Wireless On-demand Network Systems and Services Conference, Norway
2020	TPC Member, Workshop on the Future of Internet Transport (FIT), Paris
2019–2020	Workshop Organizer and TPC Chair, ICIN Conferences, Paris

2018–2019 TPC Member, CICON, PESARO, CSNT conferences

► Journal Reviewer (2013–present)

IEEE/ACM Transactions on Networking • IEEE Transactions on Wireless Communications
IEEE Transactions on Communications • IEEE Journal on Selected Areas in Communications
IEEE Transactions on Network and Service Management • Elsevier Computer Networks
ACM Transactions on Internet Technology • Springer Wireless Networks
ACM Transactions on Multimedia Computing, Communications, and Applications • IEEE Networking Letters

INSTITUTIONAL SERVICE

Jan–May 2026	Project Manager — New MSc Programme Accreditation — University of South-Eastern Norway, Drammen Led the design and accreditation application for a new master’s programme, Strategic Data Science and Management — an extensive proposal introducing multiple new courses.
2025	External Committee Member — Boston University, Professorship promotion application
2025	Internal Committee Member — University of South-Eastern Norway, Professorship promotion application
2021–present	PhD Evaluation Committee — University of Oslo, Third semester evaluations
2020–present	Defense Committee Member — University of Stavanger, Bachelor thesis examinations (3 students)
2016–present	Defense Committee Member — University of Oslo, Master’s thesis examinations (4 students)
1999–2000	Elected Member — Student Scientific Society, Ferdowsi University of Mashhad

PROFESSIONAL CERTIFICATIONS

2025	100 Students Reached Badge, Skillable (Credly)
2025	AWS Academy Educator (Credly)
2022–2023	University Pedagogical Education (200+ hours), University of Oslo
2022	Cisco Certified Instructor - Cybersecurity Operations
2021	IBM Data Science Professional Certificate (Credly)

AWARDS AND HONORS

2016	Best Paper Candidate, IEEE LCN 2016
2011	Scholarship, Ministry of Science, Research and Technology, Iran
2011	Scholarship, Ministry of Information and Communication Technology, Iran
2010	Two-year grant, Iran National Science Foundation
1999–2001	ACM ICPC Team Member (ranked 11th, 15th, 21st among 90 teams in West Asia)
1999	First Place, National Programming Contest, Amirkabir University of Technology
1999	Best Student Award, Ferdowsi University of Mashhad
1997	3rd Rank, Provincial University Entrance Examination

INTERNATIONAL MOBILITY EXPERIENCE

2011–2013	Visiting Researcher — Gwangju Institute of Science and Technology, South Korea World-Class University (WCU) project Interdisciplinary research in ICT, Materials Science, Mechatronics Grant: Ministry of Science, Research and Technology, Iran
-----------	--

EDUCATION

2013	PhD in Computer Science — University of Tehran, Iran Dissertation: Scalability in Wireless Ad Hoc Networks
2004	Master of Science in Computer Engineering — Amirkabir University of Technology, Tehran, Iran Thesis: Distributed Network Management in Active Networks using CORBA
2001	Bachelor of Science in Computer Engineering — Ferdowsi University of Mashhad, Iran Thesis: Network Management using Java Management Extension

LANGUAGES

English	Fluent	<i>Professional working proficiency</i>
Norwegian	Upper Intermediate	<i>B2 level</i>
Persian	Native	<i>Mother tongue</i>

TECHNICAL SKILLS

AI & Agentic AI	Machine learning, deep learning, LLM-based systems, RAG/knowledge agents, AI-assisted decision support, model evaluation, and responsible AI.
Data & Analytics	Statistics, optimization, data engineering, SQL/PostgreSQL, data warehousing, big-data tools, visualization, BI, and data-driven decision-making.
Network Modelling	Congestion control, network optimization, performance modelling, RINA, 5G/6G, IoT, wireless networks, cyber-physical systems, OMNeT++ , NS-2/NS-3, Python, MATLAB, and Mathematica.
Security & Resilience	AI-enabled cybersecurity, threat modelling, intrusion detection, network traffic monitoring, secure-by-design architectures, and critical-infrastructure resilience.
Cloud & Software	Python, Java, C/C++ , R, SQL, Spring Boot, React, Docker, Git/GitLab CI/CD, cloud deployment, software architecture, and full-stack development.
IoT & Edge	Raspberry Pi, NVIDIA Jetson, Arduino, sensor-based systems, edge computing, and experimental cyber-physical prototypes.
Project Methods	Agile methods, DevOps practices, software project management, requirements analysis, iterative development, and industry-oriented system design.
Applied Systems	Banking systems, digital service platforms, loyalty-programme systems, ISO 8583 messaging, smart-card technologies, and point-of-sale/payment-related systems.

SOFTWARE AND RESEARCH TOOLS

RINASim	Stand-alone RINA simulation framework for the OMNeT++ discrete-event simulator — a reliable, up-to-date tool for simulating RINA-based networks. ri-nasim.omnetpp.org

► Scientific/Academic Presentations

- [68] P. Teymoori, “Agentic ai: From business needs to working agents.” BBU, Babeş-Bolyai University, November 2025
- [69] P. Teymoori, “Harnessing the power of large language models.” RUB International Summer School, 2024
- [70] P. Teymoori, “TRICON: A Theory of Recursion in Communication Networks.” IØSS Research Seminar series, December 2023
- [71] P. Teymoori, “Chatgpt in modern education and research: A multifaceted exploration.” 11th Scandinavian Conference in Industrial Engineering and Management, November 2023
- [72] P. Teymoori, “Cyber threats intelligence & open-source intelligence in incident response.” Guest lecture, Kristiania University College, November 2022
- [73] P. Teymoori, “How networking is implemented in cloud computing.” Guest lecture, Faculty of Technology, Art and Design (TKD), OsloMet, August 2022
- [74] P. Teymoori, “Recursion in congestion control: Benefits and challenges.” Huawei workshop on RINA, June 2022
- [75] P. Teymoori, “The recursive internetwork architecture (rina): What it is, and what it is not.” Huawei workshop on RINA, June 2022
- [76] P. Teymoori, “Vehicle to infrastructure (v2i) communications.” Guest lecture, Department of Electronic Systems, NTNU, October 2021

- [77] P. Teymoori, “Key success and failure factors of smart sustainable cities.” Guest lecture, Faculty of Technology, Art and Design (TKD), OsloMet, August 2020
- [78] P. Teymoori, “Estimating an additive path cost with explicit congestion notification.” Internet Engineering Task Force (IETF) 104 Prague - ICCRG, 2019
- [79] P. Teymoori, “Advanced congestion control policies in rina.” 5th RINA Workshop, i2CAT, May 2018
- [80] P. Teymoori, “Recursive congestion management in rina.” 25th European Conference on Networks and Communications (EuCNC’16), 2016
- [81] P. Teymoori, “Programmable congestion control.” SDN & OpenFlow World Congress, October 2016
- [82] D. Hayes, P. Teymoori, and M. Welzl, “Congestion control in recursive network architectures.” Internet Engineering Task Force (IETF) 95, Buenos Aires - ICCRG, 2016. Presenter: David Hayes
- [83] P. Teymoori and M. Welzl, “Congestion control in rina.” 3rd RINA Workshop, January 2015
- [84] P. Teymoori, K. Sohraby, and K. Kim, “Fair flow control in multi-ring networks.” Workshop of the Communications and Sensor Networks Lab, GIST, August 2013
- [85] P. Teymoori, K. Sohraby, and K. Kim, “Capacity assignment problem in multi-ring networks.” Workshop of the Communications and Sensor Networks Lab, GIST, February 2012
- [86] P. Teymoori, K. Sohraby, and K. Kim, “Multi-ring networks: Maintaining fairness & honest behavior.” Workshop of the Communications and Sensor Networks Lab, GIST, August 2011
